

To whom it may concern:

Enclosed you will find a packet of information for the Integrated Reading and Writing Advanced Course - INRW 0303. The Western Texas College English Department has collaboratively written this material to provide a detailed outline of coursework that can be used to help prepare high school students for the Texas Success Initiative (TSI) placement test which students are required to pass. The following items are included:

- First day handout (including textbook information)
- 16-week schedule
- Pre-Test / Exit Test for both reading and writing

In addition to these items, the WTC English Department is willing to make the following items available upon your request: A Moodle page can be set up for the course; Moodle is the online learning platform WTC currently uses. The WTC English Lab can be made available, which students can access online. This is strongly encouraged because these assignments will supplement the grammar and reading portions of the course.

If we can answer questions or provide further help, please do not hesitate to contact us.
